the essential guide by one of america s leading doctors to how digital technology enables all of us to take charge of our health a trip to the doctor is almost a guarantee of misery you ll make an appointment months in advance you ll probably wait for several hours until you hear the doctor will see you now but only for fifteen minutes then you ll wait even longer for lab tests the results of which you ll likely never see unless they indicate further and more invasive tests most of which will probably prove unnecessary much like physicals themselves and your bill will be astronomical in the patient will see you now eric topol one of the nation s top physicians shows why medicine does not have to be that way instead you could use your smartphone to get rapid test results from one drop of blood monitor your vital signs both day and night and use an artificially intelligent algorithm to receive a diagnosis without having to see a doctor all at a small fraction of the cost imposed by our modern healthcare system the change is powered by what topol calls medicine s gutenbergs moment much as the printing press took learning out of the hands of a priestly class the mobile internet is doing the same for medicine giving us unprecedented control over our healthcare with smartphones in hand

we are no longer beholden to an impersonal and paternalistic system in which doctor knows best medicine has been digitized topol argues now it will be democratized computers will replace physicians for many diagnostic tasks citizen science will give rise to citizen medicine and enormous data sets will give us new means to attack conditions that have long been incurable massive open online medicine where diagnostics are done by facebook like comparisons of medical profiles will enable real time real world research on massive populations there s no doubt the path forward will be complicated the medical establishment will resist these changes and digitized medicine inevitably raises serious issues surrounding privacy nevertheless the result better cheaper and more human health care will be worth it provocative and engrossing the patient will see you now is essential reading for anyone who thinks they deserve better health care that is for all of us

america in the age of trump is a bracing essential look at the failure of a great nation to meet the needs of its people and the challenges of the age and the resulting collapse of public trust in government as well as a pervasive crisis of national values from broken families to a loss of faith in the american idea itself this crisis of values occurs just as the country faces an unprecedented array of fiscal economic social and national security challenges out of control federal spending frighteningly large deficits massive gaps of income and opportunity cultural division and a dangerous world in which american power seems increasingly incidental in america in the age of trump douglas e schoen and jessica tarlov offer a definitive and unique assessment of a nation in turmoil looking beneath well known problems to identify underlying yet poorly understood causes readers will confront the crises one by one of trust values and governance of education economic opportunity and fiscal solvency of national security domestic tranquility and race relations america in the age of trump gathers in one place a clear and comprehensive evaluation of the fundamental issues confronting the american future while offering bold fresh approaches to meeting these challenges other books have described the

specter of american decline but none has been so comprehensive in its diagnosis or forward looking and non ideological in its remedies explaining how we might yet overcome national self doubt to reclaim our traditional optimism reassert our place in the world and secure a prosperous future for our citizens

ukraine is embroiled in a bloody civil war both sides stand accused of collaborating with fascists of committing war crimes of serving foreign interests this proxy war between russia and the west was accompanied by a fierce information war this book separates fact from fiction with extensive and reliable documentation while remaining critical of russia and the donbass rebellion de ploeg demonstrates that many of the recent disasters can be traced to ukrainian ultranationalists pro western political elites and their european and north american backers ukraine in the crossfire tackles the importance of ultranationalist violence during and after the euromaidan movement and documents how many of these groups are heirs to former nazi collaborators it shows how the ukrainian state has seized on the ultranationalist war rhetoric to serve its own agenda clamping down on civil liberties on a scale unprecedented since ukrainian independence de ploeg argues that kiev itself has been the biggest obstacle to peace in donbass with multiple leaks suggesting that us officials are pushing for a pro war line in ukraine with the nation s eyes turned towards russia the eu and imf have successfully pressured ukraine into adopting far reaching austerity programs while oligarchic looting of state assets and massive tax avoidance facilitated by western states continue unabated de ploeg documents the local roots of the donbass rebellion the overwhelming popularity of crimea s secession and shows that support for ukraine s pro western turn remains far from unanimous with large swathes of ukraine s russophone population opting out of the political process nevertheless de ploeg argues the pro western and pro russian camps are often similar neoliberal authoritarian nationalist and heavily dependent on foreign support in a wider exploration of russo western relations he examines similarities between the contemporary russian state and its nato counterparts

showing how the two power blocs have collaborated in some of their worst violent excesses a far cry from civilizational or ideological clashes de ploeg argues that the current tensions flow from nato s military dominance and aggressive posture both globally and within eastern europe where russia seeks to preserve the status quo packed with shocking facts deftly moving from the local to the international from the historical to the recent de ploeg connects the dots
